

# Biological Neural Networks: Hierarchical Concept of Brain Function

Filesize: 8.35 MB

## ***Reviews***

*I actually started reading this article ebook. It is actually packed with knowledge and wisdom Its been printed in an remarkably simple way and it is only after i finished reading this pdf where in fact modified me, alter the way i believe.*

## BIOLOGICAL NEURAL NETWORKS: HIERARCHICAL CONCEPT OF BRAIN FUNCTION

[DOWNLOAD](#)

Condition: New. Publisher/Verlag: Springer, Berlin | This book is devoted to a novel conceptual theoretical framework of neuro science and is an attempt to show that we can postulate a very small number of assumptions and utilize their heuristics to explain a very large spectrum of brain phenomena. The major assumption made in this book is that inborn and acquired neural automatisms are generated according to the same functional principles. Accordingly, the principles that have been revealed experimentally to govern inborn motor automatisms, such as locomotion and scratching, are used to elucidate the nature of acquired or learned automatisms. This approach allowed me to apply the language of control theory to describe functions of biological neural networks. You, the reader, can judge the logic of the conclusions regarding brain phenomena that the book derives from these assumptions. If you find the argument flawless, one can call it common sense and consider that to be the best praise for a chain of logical conclusions. For the sake of clarity, I have attempted to make this monograph as readable as possible. Special attention has been given to describing some of the concepts of optimal control theory in such a way that it will be understandable to a biologist or physician. I have also included plenty of illustrative examples and references designed to demonstrate the appropriateness and applicability of these conceptual theoretical notions for the neurosciences. | 1 Limitations of Analytical Mechanistic Approaches to Biological Neural Networks.- 1.1 Inborn Automatic Behaviors From the Point of View of Classical Theory.- 1.1.1 A Brief Review of the Locomotor Behavior Evolution in Animals.- 1.1.2 Initiation of Inborn Automatic Behaviors.- 1.1.3 The Problem of Organization of Central Pattern Generators for Inborn Automatic Behaviors.- 1.1.4 Afferent Correction of Central Pattern Generators.- 1.1.5 Ontogenesis...
