Mathematics, the king of all sciences, remains and will remain as a subject with great charm having an intrinsic value and beauty of its own. It plays very important role in sciences, engineering and other subjects as well. So, mathematical knowledge is essential for the growth of science and technology, and for any individual to shine well in the field of one's choice. In addition, a rigorous mathematical training gives one not only the knowledge of mathematics but also a disciplined thought process, an ability to analyze complicated problems. We need the power and prowess of mathematics to face and solve the ever increasing complex problems that we encounter in our life. Furthermore, mathematics is a supremely creative force and not just a problem solving tool. The learners will realize this fact to their immense satisfaction and advantage as they learn more and more of mathematics. Besides, a good mathematical training is very much essential to create a good work force for posterity. The rudiments of mathematics attained at the school level form the basis of higher studies in the field of mathematics and other sciences. Besides learning the basics of mathematics, it is also important to learn how to apply them in solving problems. The basic objective of an inventory model is to reduce total average cost, i.e., maximum profit and also ensuring that the production process does not suffer at the same time. In this book, we have developed some inventory models for finding total annual average cost and optimal ordering quantity in crisp and fuzzy environment. In the past researchers assumed the parameters involved in an inventory model such as the demand, holding cost, set-up cost, deteriorating...
